

# THE LARGEST ATM MACHINES IN THE WORLD!

Avionex/USA Specializes in LARGE Turn-Key (Municipalities and School Districts) CLUSTERED Wind Turbine INSTALLATIONS; INTERCONNECTED and Selling Energy TO THE ELECTRICAL GRID; GENERATING FROM 3.5 MILLION to 15 MILLION DOLLARS in Revenue per year for each Municipality or School District searching for a way to Balance their operating Budget without reducing employees, teachers, policemen and residents' services; or raise Real estate taxes to their towns' property owners of Residential and Commercial or Industrial Real estate.

Municipal and School Districts' Clustered Wind Turbine Installations will consist of multiple Large Wind Turbines having a Power Purchase Agreement with that local segment of the Nationwide Electrical Grid having local jurisdiction and responsibility under Federal Law to buy power when offered by bonifide Electrical Power producers in the area of their jurisdiction.

## **In the State of New Jersey:**

1.0 MW Wind turbines generate approx. \$365,000 per year of income.

1.2 MW Wind Turbines generate approx. \$460,000. per year of income.

1.5 MW Wind Turbines generate approx. \$720,000. per year in income.

## **Initial Technology Orientation:**

A meeting with the appropriate person or Town Council to explain our Funding plan in detail.\*

\*NOTE: The company started a research and organizational phase at the beginning of 2010 with a newly conceived marketing plan developed by the President, Capt. Peter L. Richards, USMM who has become expert over the last three years in all facets of Wind technology and has applied that knowledge to enter initially into contractual arrangements with multiple Municipalities and School Districts for **Avionex/USA Clustered Wind Turbines™**; notably absent in the open market of the United States and other countries, because of their advanced technology.
